**DETAILED ACTION**

**EXAMINER'S REASONS FOR ALLOWANCE**

**Allowable Subject Matter**

Claims 1-4, 6-12 and 14-32 are allowed over the prior art of record as amended in the reply filed 8/01/2007.

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art of record fails to disclose either singly or in combination the claimed device of a valve for an implantable fluid delivery device with a fluid chamber having a fluid inlet and outlet; and an internal magnet disposed in the fluid chamber, the internal magnet having a north and south pole with one or more grooves on one pole, the internal magnet permitting fluid flow by moving in relationship with the inlet and outlet with the magnet having variable magnetic momentum vector axis that changes to restrict the flow of the fluid through the fluid chamber.

The closest prior art of record is Davis (6,066,088) and Erickson (6,966,325), however these references do not disclose the device as claimed by Applicant or as described above.

Regarding claims 1 and 29, the closest prior art of record fails to teach among all the limitations the magnetic valve assembly for controlling fluid flow with the variable magnetic momentum vector axis that changes with one or more grooves for fluid flow on one pole of the internal magnet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
